## Task Order #04 – Brownfield Assessment Support Activities

## 1. TECHNICAL DIRECTION DOCUMENTS (TDD)

Site specific work will be assigned under this Task Order via a TDD. The TDD will specify the site, deliverables and due dates in accordance with the requirements of the TDD clause of the contract.

## 2. ELEMENT OF THE PERFORMANCE WORK STATEMENT COVERED BY THIS TASK ORDER:

#### 1. Brownfields Assessments

The "Small Business Liability Relief and Brownfields Revitalization Act," dated January 11, 2002, defines a brownfields site. The purpose of the brownfields assessment (BA) is to streamline site investigation and to characterize site conditions. The BA does not involve collection of data associated with Hazard Ranking System (HRS) package preparation (see II.C.10). The objectives of a BA are to identify the nature and the extent of contamination on-site, identify the risks posed by the contamination, identify potential alternatives for cleanup, and determine costs of cleanup options for site redevelopment.

The contractor shall perform BA activities in accordance with the following guidance:

- "Integrating Brownfields and Traditional Site Assessment," #9230.0-81, EPA 540-F-96-028, January 1997;
- "Guidance for Performing Site Inspections Under CERCLA," EPA 540-R-92-021, September 1992 (http://www.epa.gov/superfund/sites/npl/hrsres/si/siguidance.pdf)
- "Road Map to Understanding Innovative Technology Options for Brownfields Investigation and Cleanup," EPA 542-B-97-002; This document is now available as EPA 542-B-05-001.
- "Brownfields Quality Assurance" document (EPA 540-R-98-038);
- "Standard Practice for Environmental Site Assessments: Phase I Environmental Site
  Assessment Process," American Society for Testing and Materials (ASTM), E 152794; and
- "Environmental Site Assessments: Phase II Environmental Site Assessment Process," ASTM, E 1903-97.

#### SPECIFIC TASKS LIST

This list is not intended to be all inclusive, but it is a historically based list of tasks that support the SOW requirements. For ease of organization, tasks are arranged by the activity where they have typically occurred first, for example, identification of local and elected officials could be performed as either a Response or Assessment activity. Therefore, since Response is the first activity in the SOW the task is listed under Response. This exhibit structure does not preclude using a task in any other contract activity.

The contractor shall support EPA in the following tasks:

## A. Brownfields

The contractor shall support the EPA in the following tasks:

- The contractor shall conduct a Targeted Brownfield Assessment Phase 1 in conformance with EPA's final regulations governing All Appropriate Inquiries (40 CFR 312), ASTM International's E1527-05 standard for Phase 1 Investigations, or any subsequent updated ASTM Phase 1 standard.
- 2. The contractor shall conduct a Targeted Brownfield Assessment Phase 2 in conformance with EPA's final regulations governing All Appropriate Inquiries (40 CFR 312), ASTM International's E1903-97 (2002) standard for Phase 2 Investigations, or any subsequent updated ASTM Phase 2 standard.
